

AVIATORS HOLD MEET IN CALIFORNIA

First Event of its Kind to be Held in the United States---L. Paulhan, the Great French Aviator, Makes Several Spectacular Flights.

By Associated Press
LOS ANGELES, Jan. 10.—Making a sudden and dramatic appearance before 20,000 spectators who were watching the flight of two dirigible balloons at "Aviation Park," this afternoon, Louis Paulhan, the French aviator, threw the throng into a frenzy of enthusiasm and excitement by his spectacular flight in a Farnam biplane. Rising, dipping, veering, turning gracefully as a bird, then suddenly darting for the ground, scattering a group of officials like a hawk about to alight on a brood of chickens, Paulhan gave a remarkable exhibition. He was accorded a tremendous ovation. Time and again Paulhan thrilled the crowd with his daring flights, giving little heed to the rules and regulations or the official course, racing with the dirigibles, swooping down upon the grandstand, and clearing it by a few feet until his aeroplane seemed like a thing of life. This first day of the aviation meet was given over to preliminary flights to give the aeronauts a chance to shake down their machines.

Glen Curtiss gave an exhibition in a new, untried machine in which Clifford Harmon made short flights.

In Race With Dirigible Balloon Light Machine of Frenchman Outdistances the Big Gas Bag.

Charles Willard in a Curtiss No. 1, eight and a half minutes and sailed three and three-quarters miles on his first flight. The highest altitude he reached was 150 feet. While the dirigibles were preparing for their second flight, the irrepressible Frenchman decided to start upon another journey. Covering the full course in 2:07 2-5, he started around again and neared the starting point just as Knabenshue's balloon caught the wind at the head of the stretch, and was coming at high speed. Paulhan's aeroplane shot upward and soon was abreast, and directly over the dirigible. The two craft raced with the wind at their backs, but that of the Frenchman soon distanced the big gas bag. On the second flight he remained up ten minutes and two seconds, reached a height of 400 feet and traveled about 4 1-2 miles. In the third flight Paulhan arose 300 feet and covered a mile and a half in 2:58. The flight

lasted 29 minutes and 2 seconds. In the machine which made the world's speed record of 12:42 miles in 15 minutes and 5 3-8 seconds at Rheims, Glen Curtiss attempted another flight. Starting from in front of the grandstand, he rose to a height of 20 feet in a 500-yard flight when the propeller broke. He sailed gracefully to the ground. The only accident to mar the day's program occurred when the engine of the Gill-Dosch machine started before the biplane was taken from the tent and the flare-back tore out a portion of the upper plane.

Dick Ferris, manager of events, announced tonight that Paulhan would attempt to break the world's altitude record of heavier than air machines tomorrow. He will use Farnam biplane. While the flights of well known aviators were being made today several of the machines of local construction, and unknown in design wheeled onto the field and paraded before the spectators. One, a graceful bird-like thing, made a noise like an aeroplane that sailed, but didn't leave the ground nor even the spot where it rested. Another multiplane built in this city, was shown but the engine wouldn't go.

INSURGENTS TO CARRY ON FIGHT AGAINST CANNON

By Associated Press
WASHINGTON, Jan. 10.—A defiant statement which stamps the attempt to read them out of the republican party as "unfair and malicious," and defines Cannon's administration in the house as a "climax of autocratic control," was issued tonight after a meeting of the "insurgent" members of the house. The members decline to be put out of the republican party by the regulars and announce their intention to carry the fight to a finish against Cannon and his organization. The statement says, "Without exception we are firm supporters of the republican doctrines and Taft's administration, and that reports to the contrary are without foundation." It became known today that a party caucus would be invoked against the "insurgents" on every occasion when there was a difference between the republican members, and the "insurgents" would be made to follow the caucus program or be forced out of the pale of the party.

GIVES THANKS FOR KIND TREATMENT

Tonopah, Nev., Jan. 10, 1910.
To the Editor of the Bonanza:
Dear Sir: Will you permit a stranger within your gates, and one who, by force of circumstances, ill and penniless, was forced to seek the hospitality of your county hospital, to in this manner express his keen appreciation of the treatment and consideration he there received?
In the pursuit of my profession the operation and managements of many hospitals and elmsosynary institutions in many parts of the country have come under my observation, but in no one of them have I seen more considerate treatment of those requiring it than I have witnessed in Nye county's hospital. Your county physician and your county commissioners deserve the thanks, not only of those the recipients of their kind consideration, but of every citizen of the county.

Your sincerely,
A BENEFICIARY.

SEVEN APPLICANTS FOR TEACHERS' CERTIFICATES

The regular semi-annual teachers' examination commenced at 8 a. m. yesterday morning, and at a late hour last night the applicants for certificates were still at work.

The following young ladies are endeavoring to obtain certificates:

Miss Edna Sullivan, Miss Muriel Robb, Miss Frances Gilbert and Miss Della Gilbert, all of Tonopah; Miss Ina Wheeler of Goldfield, Miss Catherine Bob of Millers and Miss Josephine McCune of Silver Peak.

RESULTS FROM

BONANZA AD.

Several days ago a lady in this city lost a gold watch. An ad. was placed in the Bonanza and yesterday the timepiece was restored to its owner. Now the question arises, "Does it pay to advertise?"

For results try the Bonanza.

MAGNITUDE OF BELMONT STRIKE IS UNKNOWN

For the past two weeks the magnitude of the recent strike in the Belmont mine has been the subject of considerable discussion, and those who have ventured to the 1100-foot level of the mine and examined the new ledge, pronounce it to be the largest and richest vein yet encountered in the Tonopah mining district. Yesterday former superintendent S. H. Brady brought down several specimens. One of these was on exhibition in Harry Epstine's office for a short time and during that period it was examined by fully a hundred men. The rock was fairly plastered with native silver in which several spots appeared to be an eighth of an inch in depth. A close examination revealed the fact that the silver penetrated all through the specimen and not only on the surface as is generally the rule. Every known form of silver, such as native, chloride, and all the sulphides are found in the rock. The value of the picked piece ran up in the thousands. When a Bonanza representative was given a chance to inspect the remaining sample he was surprised to note that the one on exhibition in no way compared to the others. A strange feature concerning the

Belief is Asserted That Mine Should Soon be placed on a Dividend Paying Basis.

values that predominate is that the ore carries about eighty ounces in silver to one ounce in gold in values. This shows a greater quantity of gold than is usually found in the Tonopah ores. In speaking of the latest development in the mine, Mr. Brady said:
"The ledge is now opened up for a distance of 90 feet in length and an average of about seven feet in width from hanging wall to foot wall with the face of the east drift showing up from nine to ten feet across. The vein strikes due east and west south 84 degrees east. The ore body is to the east of the fault which cut the Belmont vein off on the upper levels and has not been determined to be a continuation of the Belmont vein. It may possibly prove to be a continuation of the Mizpah vein to the east of the hanging wall side of the Mizpah fault. The average value of the ore extracted for the last three weeks has been from \$50 to \$75 a ton with bunches in the stope and raise, which have been started, which will run into the thousands." This statement concerning the values was easily verified by a brief glance at the specimens then in Mr. Brady's possession.

"The mine at present," continued

POLICE ARREST GIRL WHO ELOPED WITH A WAITER

Roberta De Janon and Her Aged Male Companion Are Located in Chicago After World Wide Search.

By Associated Press
CHICAGO, Jan. 10.—Living as father and daughter, Roberta De Janon, aged 17, the heiress, and Frederick Cohen, a waiter from the Bellevue-Stratford hotel at Philadelphia, who eloped on December 19 from Philadelphia, and for whom a world-wide search was instituted, were found and arrested here late today. They were discovered rooming in a house in West Superior street. Cohen, who is 43, first protested against his arrest, but soon admitted his identity. Miss De Janon, sobbing bitterly, pleaded with the authorities to restore her to her parents. Cohen revealed to the officers the story of his flight with the girl from Philadelphia that extended thousands of miles through the United States and Canada. The runaways arrived here Thursday and rented a room in a boarding house owned by Mrs. Frank Perrin. Cohen introduced the girl as his daughter, Alice. He identified himself as Robert King, and said he was a barber and had just arrived from Montreal in search of work.

When questioned the girl said she and Cohen had reached Chicago with a dollar and sixty cents between them and that she gave Cohen a bracelet and necklace which he pawned in order to get funds to live on. Cohen said tonight while locked up in the Chicago avenue station he would waive extradition proceedings. Miss De Janon and her pet fox terrier were taken to the woman's department at the Harrison street station. In a letter written January 8 by Miss De Janon to her father, Ferdinand Le Janon, a broker in New York city, which had not been mailed, the girl admitted she had persuaded Cohen to go with her. She had asked her father to see Mrs. Cohen and ask her to forgive her as she didn't realize the trouble caused by coaxing her husband to go with her. Continuing, she asked her father not to prosecute "Fred," and to be thankful for the good treatment accorded his daughter. The girl frankly admitted Cohen had treated her as his own child, and that no harm had come to her.

Mr. Brady, "is shipping 100 tons of ore per day, which will average better than \$50. Some of this is extracted from the Occidental vein, some from the Middle Vein but the majority from the new strike. "There is no question but that this vein will continue on for an indefinite distance, as the workings in the mine in this section prove the vein to be in a formation which is practically undisturbed by faults. This fact has been proven by a crosscut driven some time ago to the east to reach a point beneath the Belmont shaft, where a raise has been started to meet the shaft which is being steadily sunk to connect with the raise. The distance between the two workings is now about 130 feet and is decreasing at the rate of about four feet a day.

"It gives me great pleasure to turn the Belmont property over to my successor in a better condition than it was when I took charge and I am satisfied that the property has now proven to be a mine of considerable magnitude and undoubtedly should be able to pay dividends in a very short time."

YOUNG MAN IS FOUND DEAD IN A RESORT

By Associated Press
CHICAGO, Jan. 10.—Nathaniel Ford Moore, a son of James Hobart Moore, the financier, died of heart disease of acute cardiac dilation, according to a verdict of a coroner's jury. Moore was found dead in a resort conducted by Victoria Shaw on Dearborn street. According to the testimony given by the Shaw woman, and Pearl Moore, who was the first to discover that Moore was dead, he died yesterday afternoon, but it was not until this morning the police gave out the news. The rumors that Moore had died from the effects of drugs administered while in the resort were not substantiated by the evidence at the inquest.

COLD KILLS CATTLE.

By Associated Press
COLORADO SPRINGS, Colo., Jan. 10.—The thermometer registered 10 degrees below zero last night. There will be considerable loss of cattle along the ranges.

SAN FRANCISCO MAY BE SCENE OF THE BIG FIGHT

(By Associated Press.)
SAN FRANCISCO, Jan. 10.—Positive assurance was given by Jack Gleason tonight that the Jeffries-Johnson fight would be held in San Francisco or the immediate vicinity. This statement followed a formal application he made before the new board of supervisors for a permit to conduct a 45 round contest in San Francisco some time this year. The application was referred to the police committee. Gleason stated the fight would not be held in Salt Lake City or any of the Nevada towns.

SUIT AGAINST HARRIMAN MERGER TO BE SETTLED

By Associated Press
WASHINGTON, Jan. 10.—Negotiations have begun looking to a settlement "out of court" of the government's suit for the dissolution of the merger of the so-called Harriman lines brought under the provisions of the Sherman anti-trust law. Taft has given no intimation of his attitude or his final decision, but it is stated this will depend largely upon the proposition the railroads make in looking toward compliance of the anti-trust laws.

NEW JUDGE APPOINTED FOR NINTH DISTRICT

Judge Brown of Elko Thursday resigned his position as judge of the fourth judicial district, thus carrying out the plans for the formation of the ninth judicial district comprising White Pine county. Judge Brown was again reappointed judge of the fourth district comprising the counties of Lincoln, Elko and Clark. Thomas L. Mitchell of Ely was appointed to the position of judge of the newly formed ninth district.

NO DISSENTION NO INVESTIGATION OF CONTROVERSY

WASHINGTON, Jan. 10.—The senate without a dissenting vote adopted the Jones joint resolution today providing for an investigation of the Ballinger-Pinchot controversy. The measure was passed as a substitute for the house measure dealing on the same subject and passed Friday. An amendment was adopted providing for the investigating committee of the house to be elected by the house.

NEW ORDER OF LAND OFFICE

RENO, Jan. 10.—The land commissioner of the department of the interior, through the surveyor general of this state, has issued a notice to the deputy United States mineral surveyor to the effect that hereafter the United States surveyor general in Nevada will not issue contracts for the survey of government lands in Nevada to any deputy who has appeared as a surveyor of mining locations or an amended location, or to have acted as a surveyor for any company or individual claiming mineral land in this state. The reason given is that the department of the interior does not deem it good practice for a United States mineral surveyor to be the agent of a mineral claimant one day and an employee of the land department the next day.
